One-off prototypes to large batch production - call us for a quote now!

**Scientific Optical has over 30 years experience in the production of high quality optical components.**

We offer design, manufacture, in house coating and assembly of the finished product if required.

Our range is diverse, with micro optics from 1mm diameter to projection mirrors of 1 metre diameter.

Our customer base covers a wide range of industries including science, military, film & television, education, aviation, medicine, photography, radiation & laser.

We have our own thin films coating section producing anti-reflection and mirror coatings, together with a dedicated assembly area for proprietary items, instruments and sub-assemblies. We are also able to offer both these facilities on a subcontract basis.
